INDIVIDUAL HOME

in Benahavís, urb. Los Flamingos, plot 3 I

client | build
Ukrainian | **1277**

work

On this occasion we present Flamingos 3 I, an imposing modern style villa, in which a straight line design with clean and simple finishes stands out.

The project has been developed on a large plot, with a 1277 m2 built. In this space all kinds of amenities for the enjoyment of its owners can be found, such as a spectacular indoor pool, which you can enjoy throughout the year.

INDIVIDUAL HOME

in Cascada de Camoján B52

client
German

built
810

work

A contemporary-style house in a privileged area of Marbella. A mixture of modern and classic finishes (stone walls, homeautomation and unique marble in floors and tiles, among others).

INDIVIDUAL HOME

in Los Flamingos II urb. / plot 8

client
Dubai

built
1320

work

A moder-style house with luxury finish inside and out; large-format marble (1.20 x 1.20 m), with a lift, home automation, underfloor heating, Schüco curtain walling. On a 2,000 sqm plot with a 20 m brimming pool with colour LED stripes on the inside.

REMODELLING AN INDIVIDUAL FAMILY DETACHED HOME

in Cascada de Camoján urb. C22

client
German

built
840

work

A comprehensive refurbishment of one of the best-located houses in the luxury gated community of Marbella. The house adapts to modern quality and luxury standards without losing its Andalucian style.

INDIVIDUAL HOME

in Los Flamingos II urb. / plot

client
Ukrainian

built
1320

work

A modern-style house with luxury finished both inside and outside; large format porcelain flooring (90x90 cm), aired collapsed façade in natural stone, underheating floor, Schüco aluminium. With a waterfall-shaped brimming pool.

INDIVIDUAL HOME

in Los Flamingos II urb. / plot 14

client | built
Ukrainian | **1210**

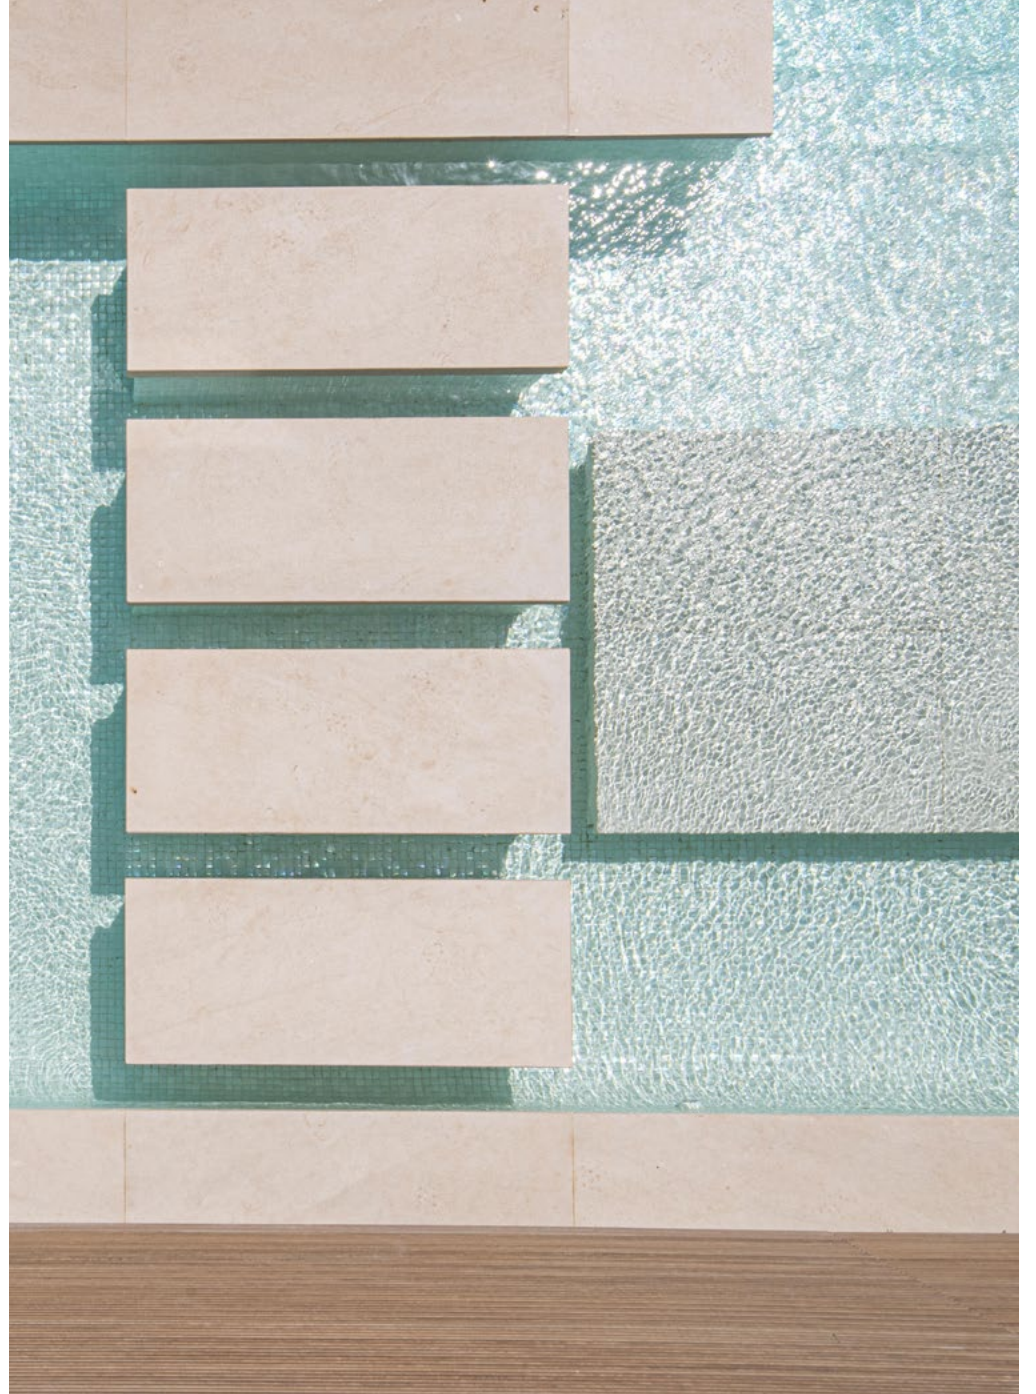

work

A truly modern, luxurious house located in the exclusive Villa Padierna (Benahavis, Malaga). Surrounded by nature under the Mediterranean sun, this villa is based on an architecture of elegant, straight line, wide rooms and a mixture of second to none materials and textures. The plot gets completed with a large garden with a brimming pool.

INDIVIDUAL HOME

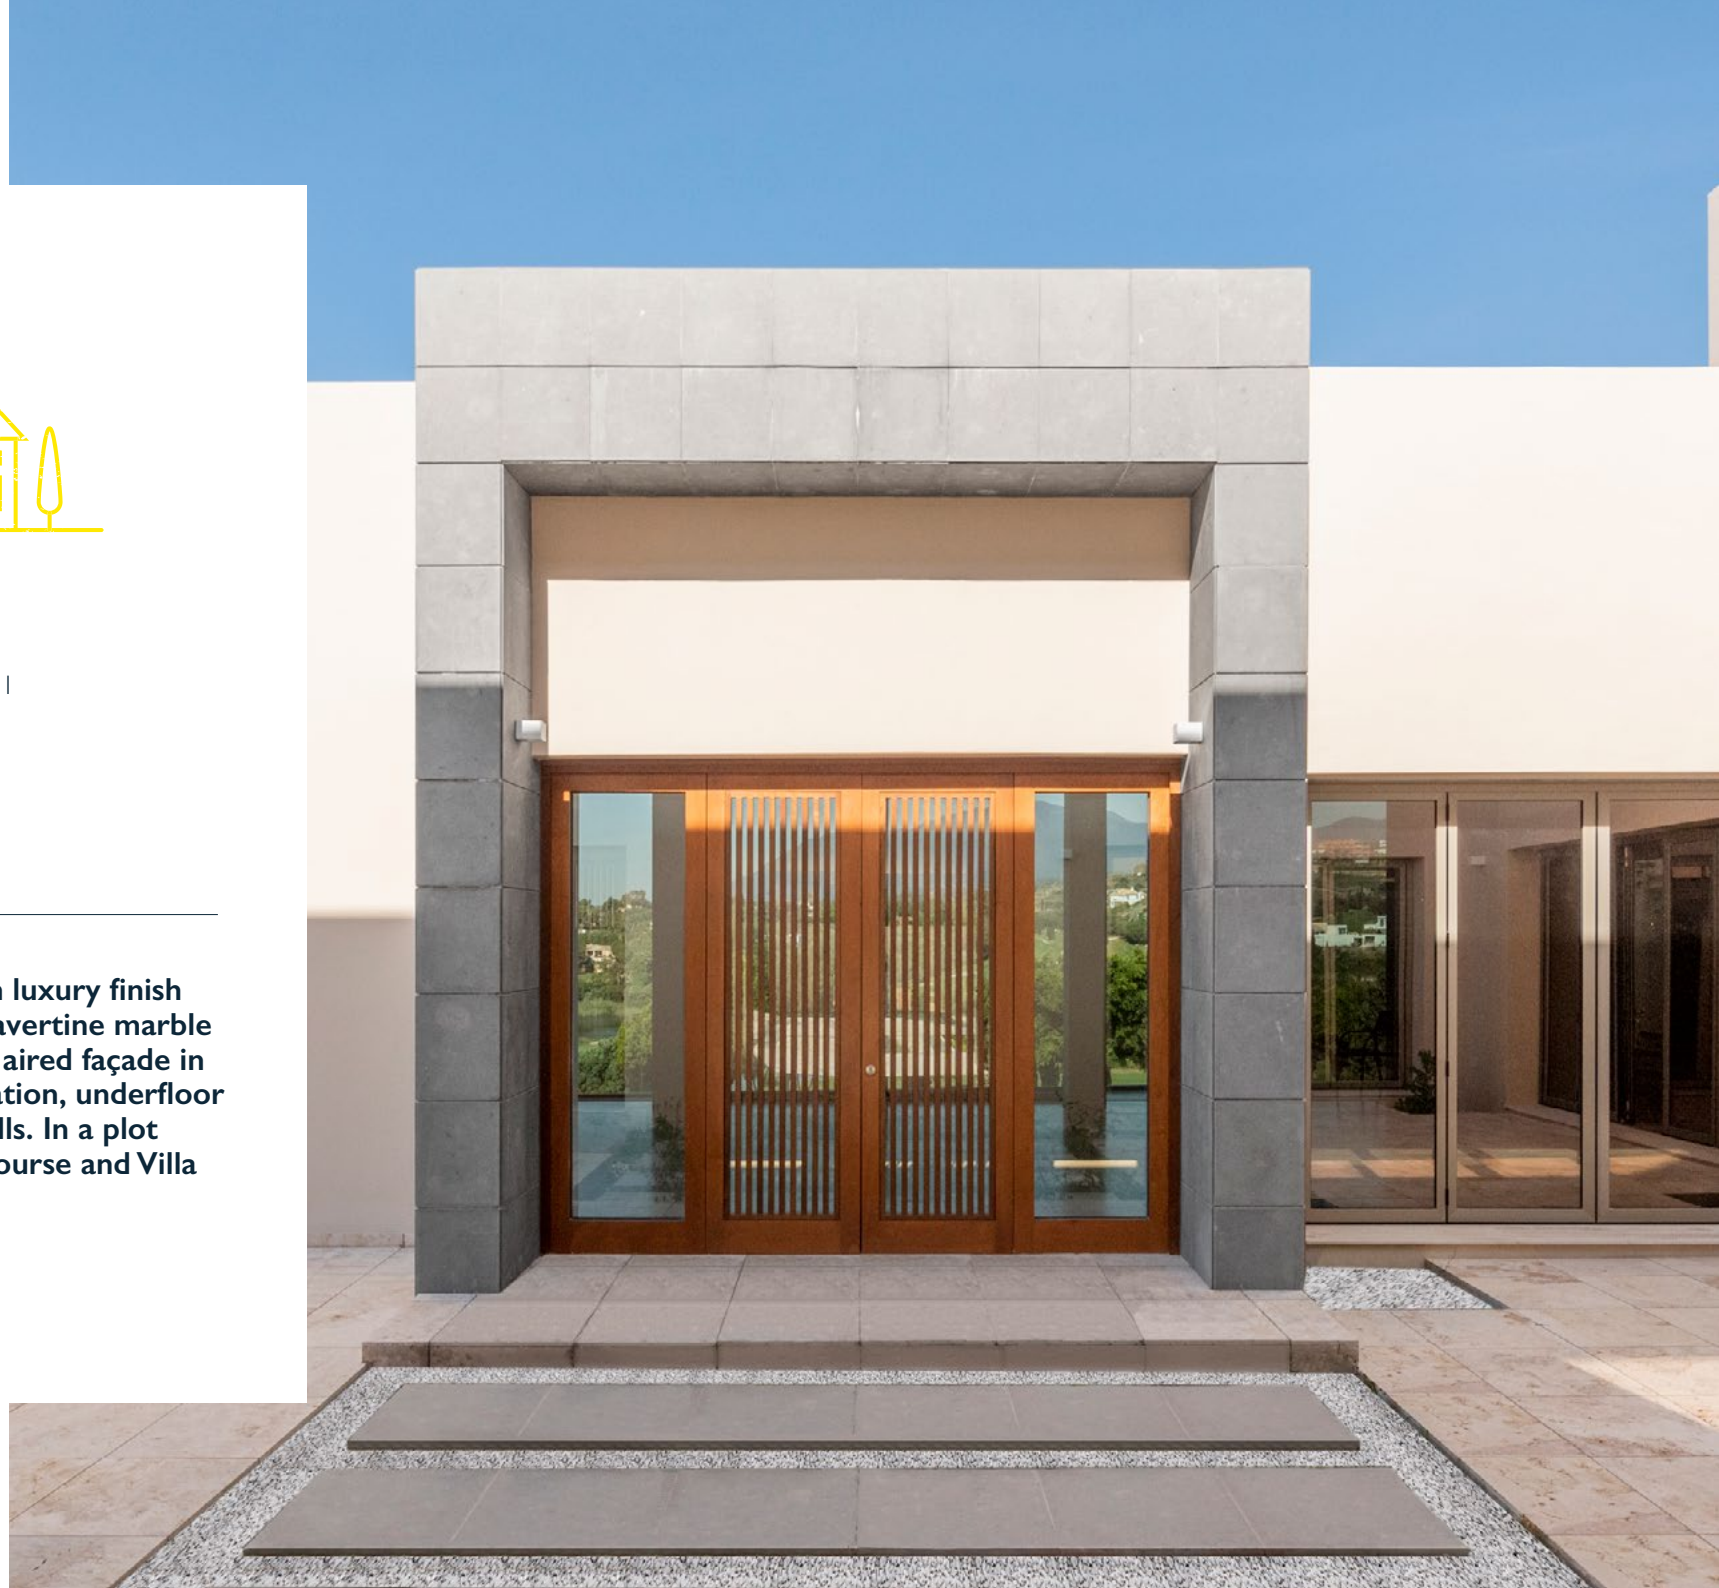

in Los Flamingos | urb. / plot 131

client
Dubai

built
1260

work

A modern-style house with luxury finish both inside and outside; travertine marble in flooring and bathrooms, aired façade in grey marble, home-automation, underfloor heating, Schüco curtain walls. In a plot bordering Flamingos golf course and Villa Padierna hotel.

INDIVIDUAL HOME

Altos Reales

client
Dutch

built
600

work

Complete turnkey interior residential design service of this astonishing luxury villa that includes full refurbishment and new build of claddings and installations systems, structural reinforcements and pool.

ANDALUSIAN PALACE

Los Flamingos, Benahavís

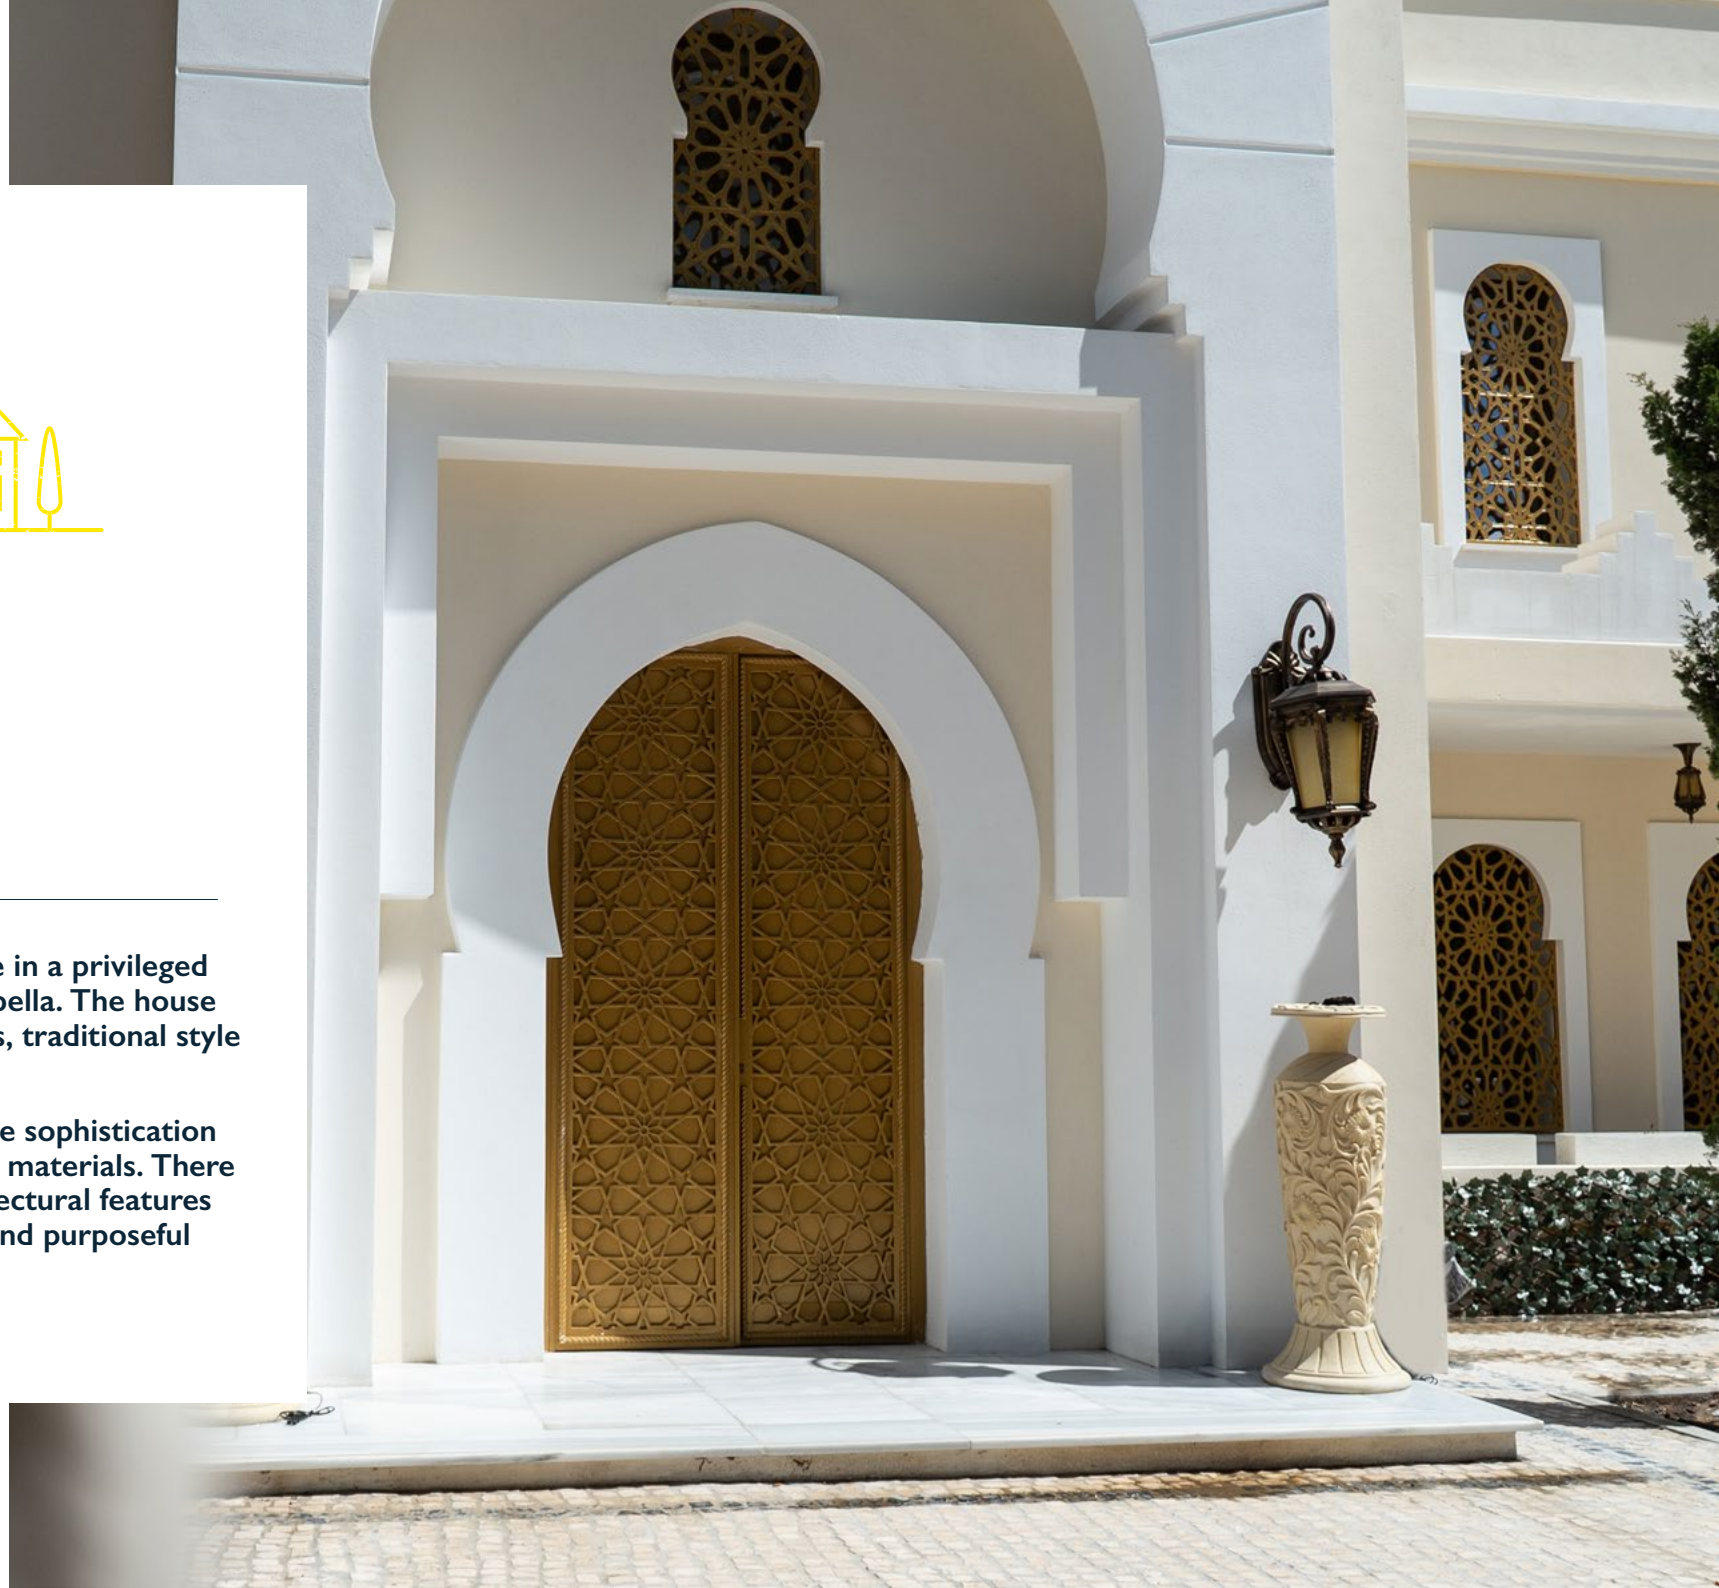

client
Dubai

built
1167

work

Beautiful Andalusian Palace in a privileged location in Benahavís, Marbella. The house has the best of both worlds, traditional style and modern comfort.

This villa combines extreme sophistication and perfectly implemented materials. There are also outstanding architectural features such as horseshoe arches and purposeful lines.

PUBLIC PARK

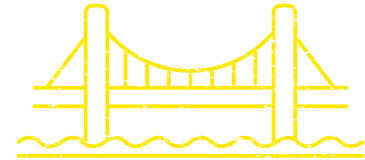

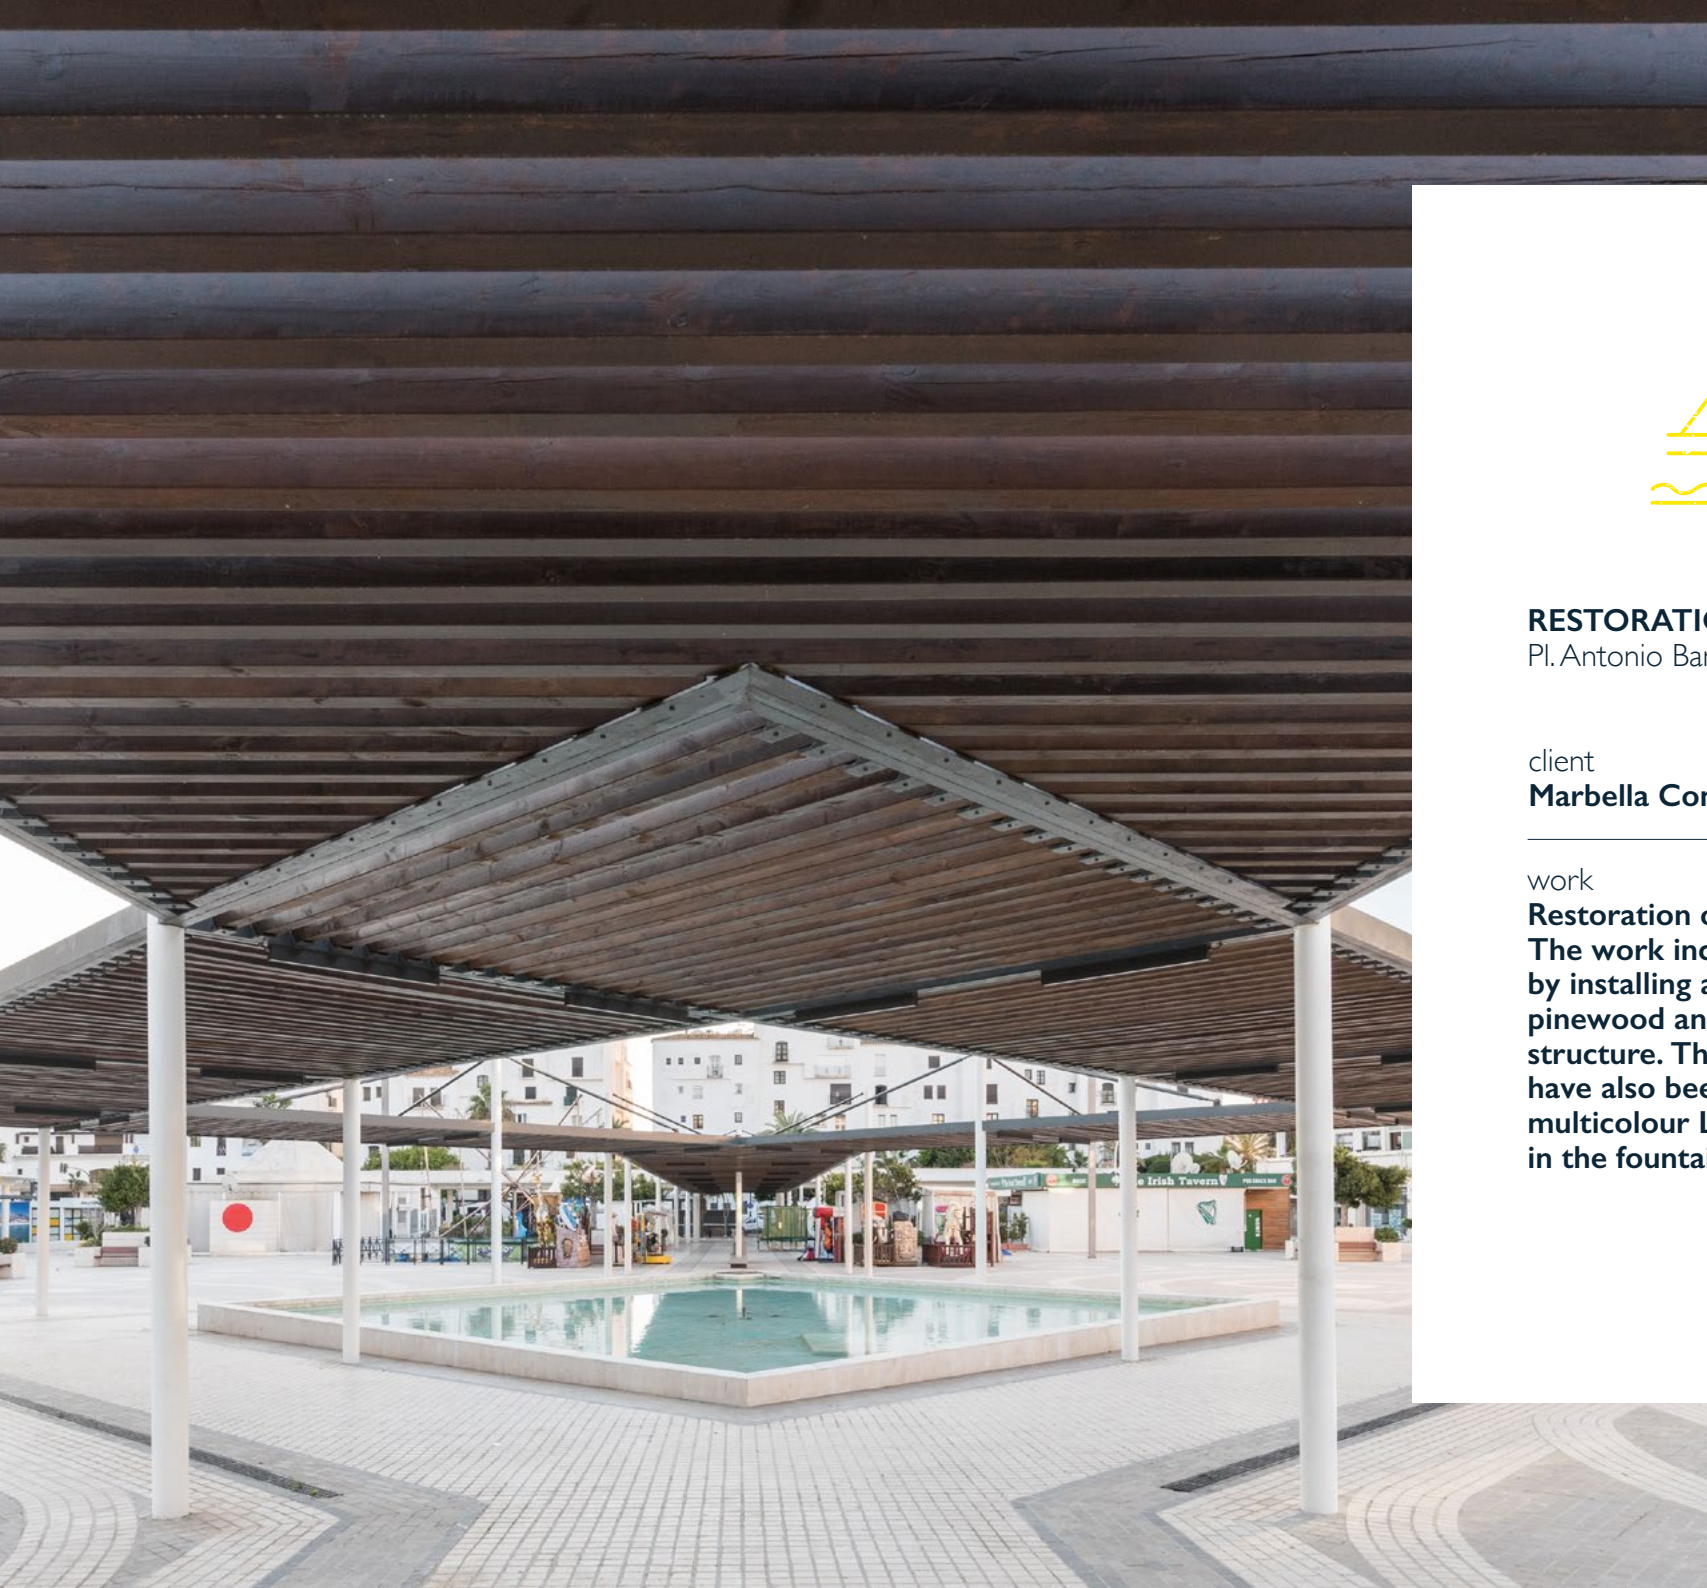

María Auxiliadora

client
Marbella Council City

built
5500

work

A public park with several playgrounds and keep-fit equipment. The park has two separate areas divided by a reinforced ground wall. There is a lawn on one side, and a landscape area with timber children's facilities on the other.

RESTORATION

Pl. Antonio Banderas square

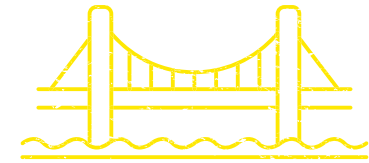

client
Marbella Concil City

built
22000

work

Restoration of main square in Puerto Banús. The work includes a shaded area (150 m) by installing a single pergola in solid Finish pinewood and a hot-galvanized metal structure. The fountains, plants and paving have also been repaired. Finally, a brandnew multicolour LED system has been installed in the fountains.

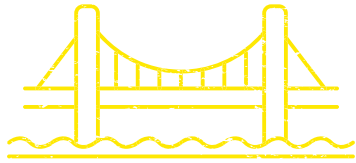

ADUAR ST. AND RAFINA ST.

Marbella's old district

client
Marbella City Council

built
2100

work
Refitting of Aduar street and Rafina street in Marbella's old district. The paving is removed in its entirety in order to install sanitation, rainwater, cable network, telephony, municipal gas and streetlighting services.

RENOVATION

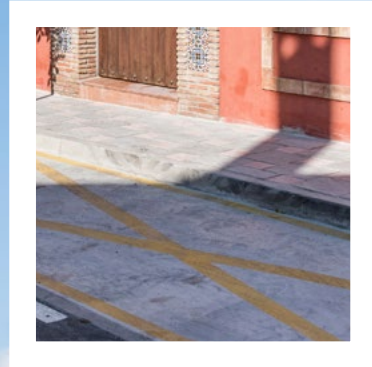

Cid st.

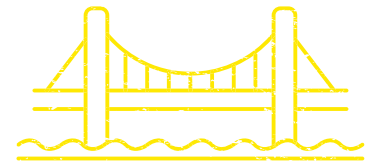

client

Fuengirola city council

work

Prinza has executed its plans for the civil works to redevelop Cid St. in Fuengirola city center. The project proposal was to put in enabling infrastructure including the renewal of sewage, waste and rain water collection systems, as well as a drinking and irrigation water supply network. Medium- and low-voltage distribution systems have also been updated to be operating with a new public street lighting. Works have been completed with the implementation of telecommunications and telephony systems and traffic control and signaling installations. Finally, there has been an improvement of accessibility by removing architectural barriers, laying special floorings, both the roads and the pavement, and caring about installation on individual objects such as lampposts and trees.

BUS STATION

Marbella

client

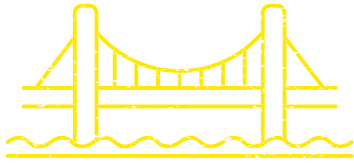

Portillo

built

2500

work

Comprehensive refurbishment of the bus station interior, plus improvement work on the outdoor car park. New ticket desks and toilets have been built.

REFURBISHMENT OF MARBELLA POLICE STATION

client
Marbella city council

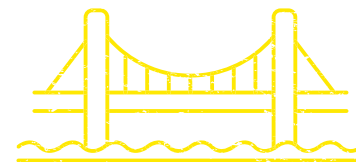

built
5433

work

The project comprises complete replacement of all electrical and communications services and necessary disassembly works to install a galvanised steel sheeting roof covering over-cladding a renewed strengthened metallic structure with an insulated render system.

Scope of works will also included partitions, installation of suspended ceilings, carpentry and floor finishes, such as raised technical flooring.

MARBELLA BULLRING

Marbella

client

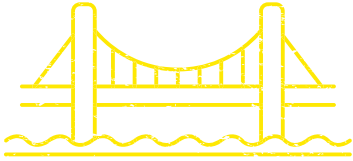

Marbella city council

work

The restoration project includes conservation repairs to the existing building like roofing defects reparation, bullring's sand floor renovation, painting and security barriers installation.

According to the developer, construction company Prinza, structural work on the facade and corrosion protective coating have been completed. Electrical wiring has been fully renovated, as well as the fire fighting system and the emergency lighting equipment.

REFURBISHMENT MARBELLA FOOTBALL STADIUM

Marbella

client

Marbella F.C.

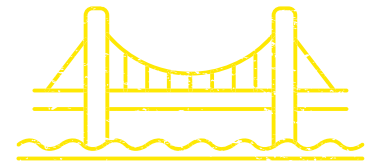

work

Waterproofing and structural repairs in the north and east grandstand came to Marbella football stadium, in Málaga.

Precast concrete elements, as well as, grandstand plastic seats were taken out for surface sealing.

High-pressure polyurea products were sprayed-on coatings to protect surfaces. This was a cost-effective and versatile solution for commercial floors and outdoor walkways, especially those exposed to moisture. The non-slip surface provides traction to wet or dry, supporting the accessibility and safety of facilities. Waterproofing works covered 820 sq meters in the east grandstand and 580 sq meters in the north one.

MARBELLA F. C. CHANGING ROOM

Marbella

client

Marbella F.C.

work

Prinza Construcciones has completed the Marbella Football Club bespoke changing room refurbishment successfully. The dressing room renovation included a full redesign, with facilities upgrades comparable to major Premier League Football teams.

We wanted to make a tribute to every player in the team, so we design custom made lockers and benches with their credentials. Space customization with the club crest and slogan were key to creating a stylish and modern area, matching the team's ambition. Let's dream big, they say, so we did it to conceptualise the project and make it come true.

residential building

MULTI-FAMILY HOUSES

10 Jinetes St. | (Málaga City Center)

client | built
Norwegian | **457**

work

Holiday home residential building located in the historical city centre of Malaga close to the Baroque Church of San Felipe Neri. The property combines classic Andalusian facades with contemporary features of modern-day living.

Prinza Construcciones managed the new build construction of this 457m2 building. The residence now comprises three-storey extension to the rear and solarium. Accommodation includes one and two bedrooms apartments intended to be holiday rented housing fully integrated with the local environment.

REFURBISHMENT

23-25 Jinetes St. | (Málaga City Center)

client | built
Norwegian | **480**

work

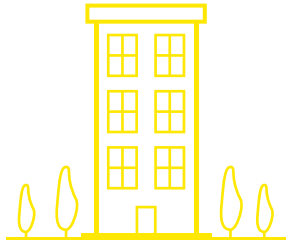

Eighteenth-century Baroque wall painting and mosaics restoration in the external facades of a historical house in Malaga city centre.

The former building was fully redesigned into independent luxury apartments intended to be holiday rented housing. Property development was promoted by a foreign investor.

MULTI-FAMILY HOUSES

Eclesiastes St. | (Málaga City Center)

client
National

built
498

work

Multifamily residential housing of seven contemporary dwellings. Located in the heart of the historical city centre of Malaga, only a short walk from the university campus.

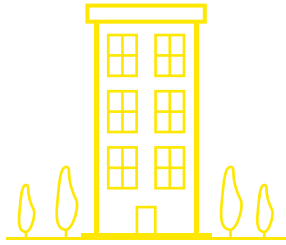

Prinza managed the build construction of this 500 m2 building internally arranged to provide one and two-bedroom flats and a stunning three-bedroom penthouse with solarium.

The property is a shining example of respectful modernism integrated into an established Malaga neighbourhood. The design concept was to play with white solid surfaces in contrast with dark metal frames and fittings.

HOUSE REBUILD

Cabello St. | (Málaga City Center)

work

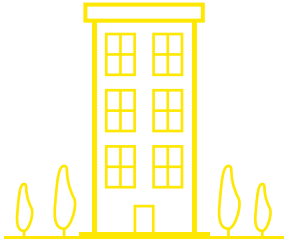

The Glass House is a stunning contemporary property located in the historical city centre of Malaga with great views to the Baroque Church of San Felipe Neri.

The house combines classic Andalusian facades with the sophisticated luxury of modern and minimalist day living. Accommodation is arranged over three levels, with a chill-out terrace and pool on the upper floor. Open plan loft space, large flat surfaces and clear custom-made tempered glass elements, such as floor-to-ceiling windows and glazing balcony railings. Split levels of the house are connected with an open-trade spiral staircase.

MULTI-FAMILY HOUSES

Las Palmeras, Marques de Duero St. |
(San Pedro de Alcántara)

client
National

built
2514

work

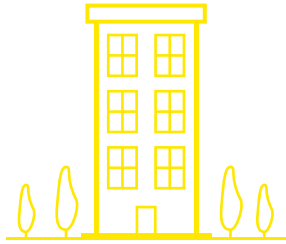

Built-in 2015, Las Palmeras residential building is located at Marqués de Duero St. in San Pedro de Alcántara (Marbella) and spans 2,514 sq. meters, including housing storeys, groundfloor commercial premise and basement.

Its 14 apartments feature balconies with views over the pedestrian area in the most centric part of a city, an extraordinary place for strolling, shopping and other activities of daily living.

MULTI-FAMILY HOUSES

Marina Mariola | (Marbella)

client
National

built
3200

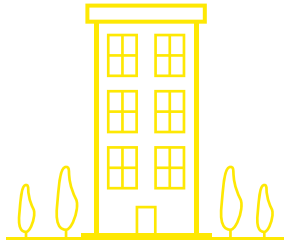

work

The Residential Marina Mariola will house up to 80 new homes, 3,200 sq. meters for residents and visitors to enjoy. The complex, which sits just opposite Marbella seafront, spans from studios and apartments, set across a 6-storey building with a basement. Apartments will feature carefully chosen materials and an exclusive seaside terrace with stunning views. Residents will not only be a stone's throw from the water, but they will also have access to a wealth of private amenities and wellness areas, including pool, jacuzzi and fitness centre. Permanent private security services are also available onsite.
